

ONLINE CHECK OF TRANSACTIONS AND LOT CERTIFICATES

Since February 2015, we launched a new program for the registration and verification of transactions of organic products made by companies certified by Bioagricert. The system foresees that companies, which sell the products, record their sales and issue the conformity declaration "transaction documents of organic products" directly via the web. From September, the system was integrated and now it allows the issuing, via the web, of other kind of certificates which are specific for geographical area or for kind of conformity declaration: NOP Export Certificates, Korea Export Certificates, Generic Lot Certificates, Certificates for Import into EU.

While compiling the transaction documents or the certificates, buyers and recipients of the goods are identified with their fiscal code (TAX ID). Buyers and recipients may register on the web site and they can verify, in real time, all the transaction documents or certificates in which they play the role of buyer or recipient. The system finds the correspondence between buyer/seller and the registered user through the fiscal code. Therefore, it is important that the fiscal code used is correct.

The access to the system allows, by applying proper filters, to make statistics and to extract data on transactions, organized in summary tables. All transactions data will be stored and they will be verifiable and printable for a minimum period of 5 years from the date of release of the transaction document, acting, therefore, as an archive.

All the documents on the web site visible for registered buyers/recipients must be considered as official and valid according to the indications reported on the documents and summarized below. Printing, signing and sending the paper document is not essential; any change/revocation will be done to the web directly and communicated to the figures involved.

Transaction document of organic products	Documents issued and released by the operator on the basis of the authorization received with the "Certificate of Conformity"
Certificates (Certificates of Import into EU, Generic Lot Certificates, NOP Export Certificates, NAQS Export Certificate for KOREA)	Certification documents released by the CB
